

1 The Greek/Roman Centaur

This human/horse hybrid is strange indeed and it has probably a million stories told about it since it's been talked about for over a thousand years

Stories tell of a proud creature from Greece or Rome that live in herds and fiercely protect their homes. They carry a bow and arrow when guarding, so you don't want to get caught alone or doing something wrong!

What's weirdest about them is that they have 2 hearts, 4 lungs 2 sets of ribcages and six limbs! Because of this they only wear clothes on their human halves!
